MonaLisa Touch™

LET'S  
TALK

woman to woman

Pause for Menopause

Is this normal?  
Am I normal??  
*It's all normal.*

**Having discomfort downstairs  
is never an easy conversation,  
neither is having menopause.**

**That is why we are here to help.**

Vaginal discomforts such as dryness, burning and urinary incontinence can occur during pre-menopause or after menopause.

At Northside Gynaecology we understand that each woman is unique and will experience discomfort differently. If you have had any of the following issues, the MonaLisa Touch™ may provide you with the results you need to live your life the way you want to.

#### **SYMPTOMS**

- Painful sexual intercourse
- Vaginal itching and burning
- Dryness and loss of lubrication
- Vaginal pain
- Incontinence and urinary urgency
- Recurrent UTI
- Contraindication to HRT

MonaLisa Touch™

MonaLisa Touch™

## *A revolutionary solution to restore function and balance*

Here at Northside Gynaecology, we offer a 5-10 minute minimally invasive procedure to help restore vaginal function with minimal side effects.

#### **HOW DOES MONALISA TOUCH™ WORK?**

- The laser gently stimulates the body's own regenerative processes to create more hydrated and healthy cells. It improves the circulation and nutrient supply to the vaginal lining.
- The laser's action safely, with minimal discomfort, reactivates and re-establishes the internal vaginal environment, it also improves symptoms associated with urinary dysfunction.

#### **HOW LONG DOES IT LAST?**

- Most women will experience significant benefit with 3 treatments, 4-6 weeks apart.
- The treatment can be repeated in 12 months or as required.
- Results experienced with the MonaLisa Touch last significantly longer than other treatment options.

## *Why choose Northside Gynaecology?*

Our female gynaecologists have a wealth of experience and understand that no woman's body or experiences are the same. That is why we are so passionate about offering our patients high quality service and the time it takes to find the best solution for their needs.

We welcome new patients to our 3 convenient Brisbane locations all of which provide you with access to the latest therapies and technologies.
